

Predictive analytics driven advanced automated testing solution designed for Agile and DevOps methodologies

Pressure to shorten release cycles

Complexity of multiple test environments

Need for improved operational stability

Need for cost efficiency

Poor Test Infrastructure

Delivering true business outcomes

60% faster test execution cycle

80% reduction in regression cost

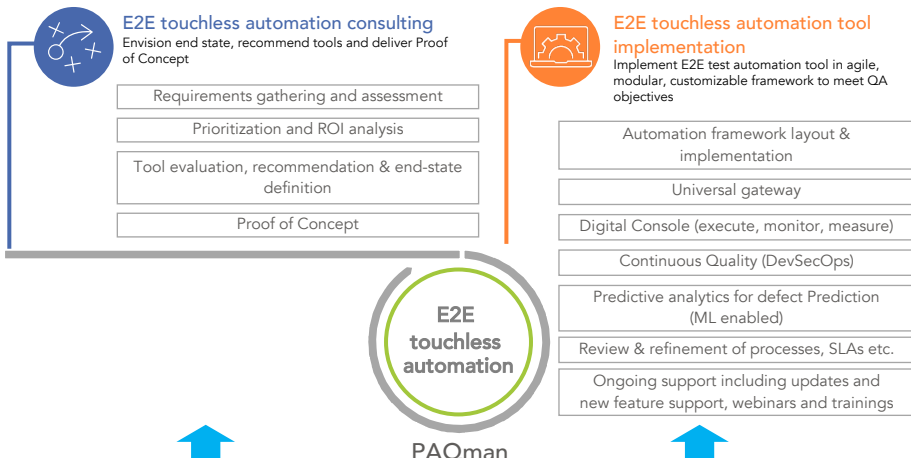

50-60% gain in Productivity

Transformed user experience through reduction in test frameworks

PAQman – Infogain’s E2E touchless automation offering

Comprehensive and modular solution for E2E touchless automation that supports Digital, Specialized, Performance and Security testing.

Framework of frameworks

Use of open source tools

Leverages existing assets

Powered by intelligence

Success stories

Leading global insurance player

80%

Reduction in regression cost

60%

Reduction in execution time

Solution

Infogain developed a flexible automated solution, leveraging **predictive analytics** to identify test cases with high risk of failure

Approach used

Test case risk assessment

BA testing support and frameworks

Smart DevOps

Shift Left automation

Leading technology player in retail space

54%

Gain in productivity

77%

Reduction in testing time

Solution

Infogain implemented **digital console** comprising execution, monitoring, reporting for E2E functional and non-functional testing

Approach used

Quality assurance testing support

Dynamic DevOps

Shift Left automation

Metric standardization

Why Infogain

Track record of delivering outcomes

Delivered up to 60% shorter test execution cycle and 80% reduction in costs for multiple, referenceable customers

Continuous Quality

Seamless integration with DevSecOps tools such as Jenkins and Jira

Predictive Analytics Solution

Predictive analytics that leverages ML based test case selection reduces test creation effort by 60%

Digital console with integrated dashboard

Comprehensive digital console with customizable dashboard providing E2E testing overview

Omnichannel and Specialized capabilities

Best in class capabilities in Omnichannel and Specialized testing (API, ETL, UAT)

About Infogain
